FRONTEND ENGINEER, LEARNING FULL-STACK

ABOUT

Grade 11 student, entering Matric next year, training through Sheryians Coding School's Cohort 3.0. Have completed frontend engineering, covering React, Redux Toolkit, and modern UI development, and am now starting backend development with Node.js, Express, and MongoDB. Working toward becoming a full-stack developer, one project at a time.

TECH STACK

FRONTEND

React

Redux Toolkit

TanStack Query

Tailwind CSS

JavaScript

GSAP

CURRENTLY LEARNING

TypeScript

BACKEND BASICS

Node.js

Express

MongoDB

SELECTED PROJECTS

CAREERTRACK

reduxtoolkit-hackathon-project.vercel.app

A comprehensive job application tracking system with authentication, protected routing, and full CRUD, engineered to streamline the chaotic process of applications, interviews, and follow-ups.

REACT REDUX TOOLKIT TAILWIND CSS

SKY-MART

sky-mart-nine-neon.vercel.app

An e-commerce landing page with smooth performance, prioritizing layout, typography, and visual hierarchy to elevate the online retail experience.

REACT REDUX AUTH TAILWIND CSS

PRODUCTIVE DASHBOARD

productivity-dashboard-lovat.vercel.app

A real-time productivity dashboard covering tasks, quote-of-the-day, weather, a Pomodoro timer, and a daily planner, built with minimal rendering overhead.

VANILLA JS HTML CSS

FINPRO TRACK

cohort-3-0-rosey.vercel.app

A personal finance tracker handling income, expenses, and spending patterns to show exactly where money is actually going.

VANILLA JS HTML CSS

EDUCATION

2025, Present

Grade 11 Student

Johannesburg, South Africa. Entering Matric next year.

Cohort 3.0

Sheryians Coding School

Full-Stack Web Development: Frontend, Backend, GenAI, DevOps, System Design

JOURNEY

Late 2025

THE FOUNDATION

Started frontend seriously: HTML, CSS, JavaScript, React, Tailwind.

Early 2026

BUILDING FOR REAL

Full projects: APIs, React Router, forms, reusable architecture.

Mid 2026

STATE & SCALE

Redux Toolkit and structuring application state at scale.

Now

EXPANDING THE STACK

TypeScript, Node.js, Express, MongoDB, toward full-stack.
